RENEGADE GTX® MID Ws

Item number 320945

ALL TERRAIN CLASSIC INDEX 4

Technic Icons

Last

S-Leisten
(schmal)

In a S last, the forefoot area is smaller than the same area in a normal last. The ball area is reduced for this purpose.

W-Leisten (weit)

In a W last, the forefoot area is wider than the same area in a normal last. The ball area is enlarged for this purpose.

Outsoles

Vibram®

For many years now, Vibram® has been the market leader for anti-slip and durable shoe soles. The hallmark qualities of Vibram® soles include the exceptional support they provide on the widest types of terrain and the optimal abrasion resistance created by the rubber mixture.

Midsoles

Support Frame

In the form of the LOWA MONOWRAP® frame, the midsole supports the foot in those places that are subject to great stress. The sole design is only slightly raised.

Midsoles

Double Injection

To provide optimal cushioning and improve comfort, the sole of the shoe is attached to the upper in a complex injection-moulding process meaning the upper shoe is placed in a specially-designed mould. The form is filled with several layers of a PU foamed material. This creates the sole and directly joins it to the upper.

Joints

Hard Stabilizer

To stabilise the soles of directly sprayed LOWA footwear, a firm nylon joint-stabilising element has been integrated into the sole. As a result, the boots are perfect for more challenging outdoor uses.

Materials

GORE-TEX®
Lining

Guaranteed weather protection, even in pouring rain and heavy snow: The innovative GORE-TEX® technology delivers optimal waterproof protection and breathability.
